

ClearShield Eco-Glass® - Recommended After-Care for Exterior Glass

Ritec's specialist maintenance solutions for glass are part of the world's first and only complete system for the renovation, 'non-stick', easy-clean protection and maintenance of glass surfaces. The award-winning ClearShield Eco-System® upgrades ordinary, high-maintenance glass surfaces into easy-clean ClearShield Eco-Glass®.

Keeping ordinary, unprotected glass free from air- and water-borne contaminants such as limescale / mineral salts, finger-marks, tree sap, bird lime or traffic pollution can be very difficult, if not impossible, despite regular cleaning. As a result, clarity and visual appeal of the glass are spoiled.

Harsh and abrasive cleaning methods and compounds create further damage and accelerate the degradation process.

The durable and effective 'non-stick' performance of ClearShield Eco-Glass® ensures the surface is always much easier to clean and keep clean, stain-resistant and maintains clarity and visual appeal for longer.

Recommended After-Care

On average, ClearShield Eco-Glass® requires cleaning half as often as ordinary, unprotected glass. To optimise the performance and durability of ClearShield Eco-Glass®, we recommend you base the frequency of cleaning by halving your current cleaning regime, and either increase or decrease it as required. Please turn over for the recommended basic maintenance programme.

Maintaining ClearShield Eco-Glass® on Exterior Glass

• Periodically

Ritec Clean-All is a specialist, concentrated, non-alkaline and non-abrasive water-based cleaner, highly effective to maintain the 'non-stick', easy-clean performance of ClearShield® protection on sandblasted and other etched glass.

- Dilute as required with fresh warm water in a bucket
- Apply by spray, cloth, brush, sponge or 'T'-Bar
- Agitate if necessary
- Rinse thoroughly with fresh water
- Wipe or squeegee dry
- Repeat process if required

Available from www.clearshield.biz, Ritec Clean-All is also highly effective for cleaning many types of surfaces including glass, ceramics, enamel, metals and plastics. It is environmentally friendly, economical and versatile.

• For stubborn limescale deposits

Ritec Limescale Remover is recommended for stubborn limescale deposits in and around the home. A non-abrasive product, it is highly effective for the removal of limescale / hardwater deposits from a wide range of surfaces including glass, ceramics, stainless steel, chrome, enamel and plastics.

Do not use on marble or other surfaces that are not resistant to acid. Do not allow to dry on metal or painted surfaces as discolouration may result. Available from www.clearshield.biz in cylindrical or trigger spray bottles.

Glass protected for life

ClearShield Eco-Glass® performs indefinitely if a simple re-application is carried out once its performance becomes noticeably reduced in terms of ease of cleaning and resistance to staining. The professional re-application can be carried out in-situ by a specialist applicator. Please contact us for more details.
